

## Linking Selected Goals to Evidence Based Practices

### Purpose

The following tables list the **Secondary School Success Checklist- (SSSC)** skills and behaviors. These are paired with educational practices which research has shown to be effective for children and youth who have autism spectrum disorder. It is important to keep in mind the priority goals identified, your students goals/strengthens and preference and the function of the behavior(s) currently being used by the student in order to achieve their desired outcome.

Foundational evidence based practices are ones that can be used most broadly and can generalize across different activities. These are *italicized*, It is strongly recommended that you how to build your understanding/fidelity of use of these first.

**This tool should be used to link the skills and behaviors identified as priorities for a student with interventions to be used to learn the skill or increase/decrease the skill or behavior.**
